**General Activities**

- Promotion of the profession to youth and integration of them into ISPRS structure
- Organization of scientific and social activities for youth (summer schools, workshops, forums, tutorials, conferences...)
- Up-to-date information on SC WEB site [www.isprs-studentconsortium.org](http://www.isprs-studentconsortium.org)
- Publications and open news/discussion forum
- International networking and support of regional and national activities
- Cooperation with ISPRS and other relevant organisations

**Summer Schools**

are organised regularly in various continents and countries. The schools include educational and training activities with practical labs embellished with social events and fun. They focus on important scientific topics and host acknowledged international lecturers.

**Web Page**

is the place where you can find useful information, educational material, Newsletters, events, news, photos and more!

**SC Newsletter**

is a free Geomatics related e-journal for youth. It is published four times per year and it is a great chance to publish your own contribution! You can find more information and previous Newsletters on our web page.
